FULL STACK DEVELOPER & CYBERSECURITY STUDENT

Kathmandu, NepalEmail AddressGitHubLinkedIn

Detail-oriented Cybersecurity student with a deep focus on building secure, high-performance web applications. Proficient in modern JavaScript frameworks and Linux systems, with a track record of implementing responsive frontends and robust API integrations. Passionate about merging secure infrastructure with elegant software design to solve complex technical challenges.

EDUCATION

Herald College Kathmandu2025 – Present

Bachelor of Computing (Cybersecurity)

- Relevant Coursework: Network Security, Linux System Administration, Software Engineering Fundamentals, Data Structures.

KEY PROJECTS

Real-Time Weather Intelligence Application

JavaScript • OpenWeather API • HTML5/CSS3

- Engineered a dynamic weather dashboard utilizing the OpenWeather API to provide real-time atmospheric data and forecasts.
- Implemented asynchronous API handling and robust error-management to ensure 100% uptime during data fetching.
- Designed an intuitive, mobile-responsive UI with optimized CSS strategies for cross-device compatibility.

IT Infrastructure & Networking Lab

Linux • Windows Server • Networking Fundamentals

- Designed and configured localized network environments (LAN) focusing on secure IP addressing and subnetting.
- Performed comprehensive Linux system administration, including user privilege management and automated scripting.
- Executed hardware diagnostics and network troubleshooting, optimizing system stability and connectivity.
